Pp. 846 & 1110. The names of the officers of the Agricultural Association for Upper Canada, of the Board of Agriculture, and of the Horticultural Society, are incorrect in some particulars. The following, recently received, is to be substituted:—

PROVINCIAL AGRICULTURAL ASSOCIATION.

B. Stevenson, M.P.P., Picton, president; William Ferguson, Kingston, and John Wade, Port Hope, vice presidents.

Officers.—R. L. Denison, Toronto, treasurer; professor Buckland, Toronto, secretary of the Board of Agriculture, and J. Edwards, Toronto, secretary of the Board of Arts and Manufactures, joint secretaries; professor Croft, University college, consulting chemist; James Fleming, Toronto, seedsman; Bank of Upper Canada, bankers.

BOARD OF AGRICULTURE.

Office 52 King st. east.

Hon. P. M. Vankoughnet, minister of agriculture; E. W. Thompson, Toronto, president; J. B. Marks, Kingston, vice president; D. B. Stevenson, M.P.P., Picton, president of the Agricultural Association, W. B. Jarvis, president of the Board of Arts and Manufactures; D. Beatty, Cobourg, vice president of the Board of Arts and Manufactures; rev. Dr. Ryerson, chief superintendent of education, C. W.; R. L. Denison, Toronto; professor Buckland, Toronto, secretary; hon. Adam Fergusson, Woodhill; sheriff Ruttan, Cobourg; David Christie, M.P.P., Brantford; Asa A. Burnham, Cobourg.

The members of this Board constitute the Council of the Provincial Agricultural Association, as above, between the annual meetings thereof.

TORONTO HORTICULTURAL SOCIETY.

His Excellency the Governor General, patron; G. W. Allan, president; J. D. Humphreys, professor Buckland, and Robert Beard, vice presidents.

Officer.—James C. Small, secretary-treasurer.

Committee of Management.—Rev. T. Schreiber, sheriff Jarvis, George Leslie, Rice Lewis, John Gray, captain Jones, hon. Jos. C. Morrison, F. W. Coate, James Fleming George Sootheran, J. A. Simmers, and Alexander Mason.

N.B.—The information as to Newspapers and Bank officers, as printed under the different places, is in some cases incorrect, owing to changes during the time the different sheets were printing. For a list of Newspapers and Bank officers as corrected to the *latest moment*, see pp. 1022–1025 and 1140–1145.

Entered, according to the Act of the Provincial Parliament, in the year one thousand eight hundred and fifty-seven, by JOHN LOVELL, in the office of the Registrar of the Province of Canada.

PREFACE.

THE labour and expense attendant upon the preparation of a work professing to be a Directory of Canada were of so serious a nature that the Publisher shrank from assuming the responsibility until he had inquired whether there were not many besides himself who, having experienced the want which he had felt, would assist him to produce a remedy for an admitted evil.

With a view to arrive at the general sentiment on the subject, and also to discover the amount of positive encouragement that such a work would receive, a Prospectus of "THE CANADA DIRECTORY" was published, and very generally distributed throughout the Cities and Towns of Canada. The answers which he received to these circulars were of a character so encouraging and complimentary, as to induce the Publisher to take immediate steps to accomplish the end which he had proposed to himself, and inaugurate a work which should prove alike useful to the Province and creditable to the Press.

Of the way in which the duty has been discharged it does not become the Publisher to speak. He may however be permitted to say that neither pains nor expense have been spared to render the work accurate and complete; and also that, in regard to the style and manner of its execution, "The Canada Directory" will compare most favorably with publications of a kindred character which have received the approval of older countries.

It may be remarked that the title of the book conveys but an inadequate impression of the information which will be found in its pages. It is commonly supposed that a Directory is but an index to the places of business or private residences of the individuals whose names it records. The reader, however, will at once discover, upon referring to the General and Miscellaneous Index, that the work before him contains a much larger fund of useful matter than its name imports. It is no exaggeration to say, that it is a Directory for the man of business and a Guide-Book for the man of pleasure, an Index for the immigrant and an Instructor for the settler, a Gazetteer for the student and an Army-List for the militia officer, while for the statesman and others connected with official life it is a Statistical Chronicle of the progress of the country in all departments of enterprise.

It will thus be seen that the Canada Directory occupies a large space in the field of local information. In its projection it was designed to meet popular favor; in its prosecution this desirable end has been kept steadily in view. And now, believing that he has performed his part, the Publisher trusts that he may not look in vain for the support of an enlightened public.

Dependent not only upon the fidelity of paid agents, but also upon the voluntary assistance of many other gentlemen for the information which his work contains, the Publisher would be wanting alike in duty to his own feelings and their services, were he to permit the present occasion to pass without expressing his sincere acknowledgments. To the Officers of Government, of Private Companies and Public Institutions, he is deeply indebted, not only for the valuable information they were good enough to communicate, but for the kind manner in which it was conveyed. Their generous assistance has indeed facilitated his labour, and immeasurably augmented the value of his work. In returning his grateful thanks for these voluntary services, the Publisher believes that he is not only expressing his own feelings, but also the sentiments of those who warmly encouraged him to enter upon the responsible undertaking.

Where assistance has been general, it may seem almost invidious for the Publisher to particularise the sources whence it has been received. Still there are gentlemen in regard to whom the sense of gratitude presses so seriously upon his mind, that he cannot deny himself the pleasure of giving it expression.

To the Officers of the Post Office Department, the Publisher desires to return his sincere thanks. Indeed, the spirit of good-will and courtesy which animated the authorities at Toronto appeared to pervade all the Branches; for the Postmasters throughout the Province, of whom enquiries were made, manifested the greatest readiness, not only to afford information, but by personal attention to secure the accuracy of the matter submitted for their review.

The Statistical and Militia information which the work affords will best illustrate the Publisher's obligations to the gentlemen connected with the Bureau of Agriculture, with the Crown Lands, the Inspector General's, and the Adjutant General's Departments.

The important articles on Education, while they add to the attractions of the Directory, impose upon its Publisher the duty of making grateful acknowledgment of the services thus rendered by the gentlemen superintending the Educational interests of Eastern and Western Canada; nor should he omit to mention at the same time his indebtedness to Mr. Hodgins' Canada Educational Directory for large and valuable extracts on these interesting subjects.

In printing a work which it is the intention of the Publisher to re-issue at stated intervals of two years, and in claiming for its mechanical features a more than ordinary amount of credit, it is but just to state that the book is of Canadian manufacture; for the excellent type with which it has been printed was made by Mr. Palsgrave of Montreal, and the paper by Messrs. Alex. Buntin & Co., at the Valleyfield Mills, Beauharnois; while the beautiful Map engraving was executed at the establishment of Mr. George Matthews of Montreal.

The Publisher should, perhaps, hesitate to print the names of gentlemen from whom he has received much private assistance; still he cannot deny himself the gratification of offering his respectful acknowledgments to Sir W. E. Logan, for much information, prepared from the notes of his own most valuable Geological Surveys. And also to Thomas C. Keefer, Esq., his warmest thanks are especially due for the beautiful Map which accompanies the work, and which that gentleman has generously presented to beautify and illustrate "The Canada Directory."

BELLEVILLE, C. W.—A Town in the Township of Thurlow and County of Hastings, situated on both sides of the River Moira, which debouches into the Bay of Quinté. It is the chief Town of the County, and it is a Port of Entry, doing a considerable business in imports, and also in the export of lumber, flour, and other agricultural produce, supplied by various manufacturing establishments in the neighbourhood, and by a flourishing farming district. There is a probability that the business of the port will be largely increased by its contiguity to the Marmora Iron Works, and to the quarries of valuable marble lately discovered and brought into active operation. The County is divided into North and South Ridings, each returning one Member to the Legislative Assembly. A steamer leaves every morning for Kingston, distant 54 miles, fare $1.50 and $1, and returns the same evening, calling also at Picton and Bath. Two other steamers, plying between Trenton and Montreal, call here on their passage up and down; fare to Montreal $5 and $2.50. The Town is on the line of the Grand Trunk Railway. There are two daily stages to Stirling, 15 miles, fare 50c., the earliest of which meets stages from Marmora and Seymour; another to Hungerford, 25 miles, fare $1; and another daily to Madoc, 25 miles, fare $1. Distant from Montreal 220 miles, and from Toronto 113 miles. Daily mails. Population about 7000.

BOWMANVILLE, C. W.—An incorporated Town in the Township of Darlington and West Riding of the County of Durham. It is bounded on the south by Lake Ontario, and is situated on the line of the Grand Trunk Railroad. The first village lots were laid out in 1832, when there were but two or three houses in Bowmanville. In 1850, the population being just over 1000, the place was incorporated as a village. Within the last ten years it has increased and prospered rapidly, in a manner unequalled even in Canada; and it owes much of its present importance to the Hon. J. Simpson, formerly of the firm of Bowman & Co. The town has excellent water power within and around it, as well as a capital wharf; and a first-rate harbour is now being constructed. The country around is unsurpassed for fertility and salubrity. Distant from Toronto 43 miles, and from Port Hope 19 miles. Railway fare to Toronto $1.50. Daily mails. Population about 4000.

CHATHAM, C. W.—A Town in the Township of Raleigh and County of Kent. It is the chief Town of the County. It is situated on the River Thames, about 18 miles eastward from where that stream debouches into Lake St. Clair. The river is navigable to Chatham for vessels of the largest class. Some of the finest sailing craft on the inland waters of the continent have been built at this place. The progress of Chatham within the last few years has been very rapid, and it owes much to the fine agricultural country and the enterprising class of settlers with which it is surrounded. It has several fine public buildings. The Great Western Railway passes through the Town near its present southern limits. An extensive trade is carried on here in wheat and other agricultural produce, and it is constantly increasing. Oak and walnut timber, West India and pipe staves are exported in large quantities. It is expected that a Canal from the River St. Clair to the Rond'Eau Harbour will shortly be constructed, passing through this place. Two steamboats ply regularly between Chatham and Detroit. Distant from Windsor and Detroit by Great Western Railway 87 miles, from London 64 miles, from Hamilton, 38 miles, and from Toronto 176 miles. Daily mail Population about 6000.

‡CLIFTON, C. W.—An incorporated Town in the Township of Stamford, County of Welland. It is situated at the celebrated Suspension Bridge, which crosses the Niagara River about a mile below the historically known Niagara Falls, and connects Western Canada with the State of New York by railway. This place is the eastern terminus of the Great Western Railway, and connects, with the Railways in the State of New York, to all parts of the American continent. The Erie and Ontario Railway, which connects with the Ontario steamers at Niagara, distant 13 miles, also passes through the town, and has a station here. The Suspension Bridge at this place is said to be the most scientific public work on the continent. It is suspended in air, 250 feet above the river, by four wire-cables each 10 inches in diameter, from towers 75 feet in height, a distance of 822 feet from tower to tower,—the total length of wire in these cables being 4,000 miles. There are two roadways, one above the other, the upper one having a railway with three different guages, the lower one for waggons, &c. This place is rapidly rising into importance. Distant from St. Catherines 13 miles, from Hamilton 43 miles, from Windsor, the Western terminus of the Great Western Railway, 229 miles, and from Buffalo, N. Y., 22 miles. Daily mails.

COBOURG, C. W.—A Town in the Township of Hamilton and County of Northumberland. It is the chief Town of the County, and is pleasantly situated on the North shore of Lake Ontario. There is an excellent harbour, affording safe accommodation, and whence last year were exported 7,000 barrels flour, 200,000 bushels wheat, 500 kegs butter, and 14,000,000 feet of sawn lumber. The proximity of Cobourg to Rochester and other ports on the American shore of Lake Ontario renders it a first-class business settlement; and the fertile soil of the neighborhood, with the advantages of a ready market and unsurpassed water power, have raised Cobourg in fifty years to its present position. During the season, steamers call daily from and *en route* to Toronto, Kingston and Hamilton, and to Rochester, N. Y. Cobourg is a station of the Grand Trunk Railway, and a terminus of the Cobourg and Peterborough Railway. Distant from Toronto 72 miles, from Kingston 103 miles, and from Montreal 260 miles. Daily mails. Population about 7000.

GASPÉ, C. E.

[This portion of Canada, in its general characteristics,—resources, commerce, geography, &c.,—presents such a dissimilarity to the other Districts of the Province, that it has been deemed advisable, with a view to its just appreciation, to deviate in some measure from the usual plan of this work, by the insertion of the following general description of this District, which has been kindly furnished by Peter Winter, Esq., of Percé. An additional reason for this course is afforded by the circumstance, that the agent who was specially engaged to take personally the particulars of all the Villages in that neighbourhood, was obliged, by an unexpected breaking-up of the winter roads, to abandon the task in the midst of his journey. Some idea of the impediments he encountered will be conveyed by a knowledge of the fact, that from the time he left Montreal, on this business, a period of 90 days elapsed before he could effect his return to the city. However, subsequent efforts have enabled the publisher to furnish the necessary information of most of the places comprised in the District, which will be found on reference to the general Index.]

This District, comprising the Counties of Gaspé and Bonaventure, is surrounded from Cap Chat to Cap des Rosiers by the waters of the River St. Lawrence; thence to Pointe aux Maqueraux by the waters of the Gulf, this point being the boundary between the two counties; thence to Point Maguacha by the Baie des Chaleurs, and thence westward to the uppermost end of the District by River Ristigouche: the whole extent being about 375 miles of coast, intersected by numerous smaller rivers, bays, and harbors, and being throughout a most valuable and inexhaustible fishing coast,—more particularly so the County of Gaspé, and the Magdalen Islands, situate in the centre of the Gulf. The chief resources of the District, with respect to exportations, are the cod, salmon, mackerel, herring, and whale fisheries, and lumber; the former principally in the County of Gaspé, and the latter principally in the County of Bonaventure. The imports, consisting of the necessaries of life in the way of provision and clothing for the total supply of nearly two thirds of the population (not being producers or manufacturers), make of this District an extensive market for the products of other parts of the Province, contributing largely to the public revenue. The trade carried on hitherto has been retained by a comparatively small number of houses (who have realized large fortunes), leaving yet room for many competitors. The population of the District, 20,748 per last census, may now be estimated at about 25,000, mostly settled along the coast, leaving immense tracts of wild lands fit for cultivation. The County of Gaspé consists of the following Township Municipalities,—the populations given are those of the last census:—

	Population.	Mayors, who constitute the Main Division County Council.
Percé (County Town),	2160	Henri Paradis.
Newport and Pabos, united,	1025	James M. Remon.
Grand River (Seigniory),	689	F. X. Dugal.
Mal Bay	780	Jacob S. Packwood.
Douglas	819	Bernard Conolly.
Gaspé Bay South and York, united,	606	James Perchard.
Gaspé Bay North and Sydenham, united,	288	Golbert Lavergue.
Cap des Rosiers,	785	None appointed.
Fox	584	

Secretary-treasurer, O. T. Connick, M.D.

The remainder of the County, Ste. Anne des Monts and Cap Chat, &c., population 936, and the Magdalen Islands, population 2203 being separate County Municipal Divisions, have power to establish separate local register offices; but so far the Percé office is the only one for the whole County.

Post Office route through the District:—The mail from Métis, Matane, and Cap Chat, to Ste. Anne and Fox River, is carried on foot, fortnightly; thence to Grand Grève (Cap Rosier Township) and Gaspé Basin, on foot, weekly; and thence to the following offices, and throughout the County of Bonaventure, semi-weekly, with vehicles, which convey travellers at 4d. per mile,—Gaspé Basin, Douglastown, Point St. Peter (Malbay Township), Percé, Cape Cove (Percé Township), and Grand River.

The County of Bonaventure consists of the following Township Municipalities,—the populations given are those of the last census:

	Population.	Mayors, who constitute the County Council.
Cox,	1693	John R. Hamilton (Warden).
Port Daniel,	826	William McPherson.
Hope,	1107	Barnabas McGee.
Hamilton,	1031	
New Richmond,	1274	John Howatson.
Carleton,	855	Romain Landry.
Maria,	1349	
Nouvelle and Shoolbred,	1309	James Paschal Quinn.
Mann,	509	Thomas Wilson.
Ristigouche,	505	James Sillars.
Matapedia,	326	

Secretary-treasurer, J. G. Le Bel.

The mail is conveyed semi-weekly, in vehicles, at all seasons, (passengers at 4d. per mile,) to and from Quebec, connecting at Grand River, through the following stations: Port Daniel, Paspebiac, New Carlisle, New Richmond (Cascapedia), Carleton, and Cross Point (Ristigouche). There is another mail route from New Brunswick across the Ristigouche, and (on foot in winter) from Ristigouche to Métis.

GODERICH, C. W.—The chief Town of the County of Huron. It is beautifully situated on the East shore of Lake Huron, at the mouth of the River Maitland, and has a good and convenient harbour, which is being enlarged and improved. Goderich is the western terminus of the Buffalo and Lake Huron Railway. It has daily communication by steamboat during summer with Sarnia and Detroit, and steamers leave at regular intervals for Kincardine, Port Head, Baie du Dard, and Saugeen, ports further north on the same shore; and upon the completion of the Buffalo and Lake Railway, this autumn, a large portion of the travel and traffic of Lake Superior and the Great West will pass through the place. The country around Goderich is of the most fertile character, and large quantities of wheat are annually raised and exported from the neighbourhood. The fisheries prosecuted at various points along the coast have also been productive of considerable wealth to the Town. The land to the north of Goderich not having been brought into the market for sale and settlement until within the last five years, the progress and prosperity of the place was for a long period much retarded; but it is now rapidly advancing in commercial importance and population. Distant by railway from Stratford, where the Buffalo and Lake Huron Railway connects with the Grand Trunk, 44 miles; from Buffalo, N. Y., 160 miles; from Sarnia by steamboat 65 miles; and from Toronto by railway 132 miles. Population about 4000.

GROSSE ISLE, C. E.—The Provincial Quarantine Establishment, situated on the River St. Lawrence opposite the village of St. Thomas, the present Terminus of the Quebec Branch of the Grand Trunk Railway. The Island is healthy, and is surrounded by scenery of a very picturesque character. It is two and a half miles in length, and about a mile in width. A solid, substantial wharf has been built, having a depth of seventeen feet at low water, at which vessels or steamers may land or embark passengers. This Island is the property of the Province, and is wholly devoted to Quarantine purposes. No persons but those belonging or necessary to the Establishment are allowed to reside on the Island, or to visit it without a pass from the Emigrant Agent at Quebec. All Emigrant ships arriving in Canada are rigorously compelled to stop at Grosse Isle until inspected by the Medical Superintendent and the passengers passed clean and healthy. A large washhouse, as well as ample sheds and every requisite appliance, are provided on the Western extremity of the Island for emigrants ordered, by the Medical Superintendent, to land from on board of vessels in which malignant or contagious diseases may have made their appearance during the voyage, for cleansing and the purification of their luggage. These are situated at the Eastern end of the Island; the residence of the principal officers being in the centre. No communication is permitted between the two extremities of the Island unless a written pass is granted by the Superintendents. Two Clergymen respectively of the Church of England and the Roman Catholic Church are stationed at the Establishment during the season of navigation. A provision dealer is allowed to contract, under certain conditions, to furnish supplies for the Island. A small force of Police is constantly on the Island while the Establishment is in operation. There is no Post office; but letters, whether to persons connected with the Quarantine or to passengers, are forwarded regularly twice a week through the Emigrant office in Quebec,—a steamer being annually engaged to maintain constant, but only authorized, communication between Quebec and Grosse Isle. Distant from Quebec about 29 miles.

GUELPH, C. W.—An incorporated Town, situated on the River Speed. It is the chief Town of the County of Wellington. Guelph is a first-class Station on the Grand Trunk Railway. It is the northern terminus of the Galt and Guelph Railway, which connects with the Great Western; and the southern terminus of the proposed Railway to Saugeen, the distance to which is about 70 miles. From Guelph there are regular stages to Owen Sound, through Fergus and Elora, and a regular mail to Southampton. Being the centre of a rich agricultural district, Guelph has a large retail country trade; its exports are chiefly wheat and flour. In the neighbourhood of Guelph there are very valuable quarries of building stone, which will probably soon become a regular article of trade. Distant from Toronto 47 miles, and from Hamilton 30 miles. Mail daily. Population about 4500.

HAMILTON, C. W.—Is situated on the South-western extremity of Burlington Bay, in the Township of Barton and County of Wentworth. It was laid out in 1813, and occupies a space extending back from the Bay to the base of the Mountain, a distance of about a mile and a half. The land rises gradually the whole distance, affording excellent facilities for drainage. Situated at the head of Lake navigation, and in the very centre of the finest grain-producing country in America, with railways, completed or in prospective, diverging in various directions through the best settled and wealthiest portions of Canada, it is destined to become a great commercial city. For the past seven years it has progressed with almost unexampled rapidity. In 1841 the reported population was 3446, which in 1850 had increased to 10,312, and now it is estimated that the number of souls has reached a total of nearly 20,000. The assessed value of real and personal property in 1850 was $246,296, and in 1855, $761,916. The Customs duties on imports for 1853 amounted to $3,545,509, which had increased in 1856 to $5,490,025. Hamilton is the head quarters of the Great Western Railway, the Hamilton and Toronto, and the Hamilton and Port Dover Railway Companies. The length of the Great Western Railway, from Niagara Falls to Windsor, opposite Detroit, is 228 miles, passing through the most populous and fertile portion of Canada West, and connecting the Central Railroad of Michigan and the Upper Lakes with Lake Ontario, as well as with the numerous lines of railway through the State of New York to Boston and New York. It is one of the best paying railways in America. The streets of Hamilton are generally laid out at right angles; those running back from the Bay having a direction nearly north and south, and being crossed by others running east and west. The buildings are chiefly of stone and brick, and many of them are of imposing appearance. Hamilton has two of the largest and finest hotels in the Province; and the banks, public buildings, churches, and many of the merchants stores, are handsome and costly structures. On the rising ground approaching the Mountain are a number of elegant residences, which are not surpassed in Canada, with grounds beautifully laid out and tastefully ornamented; and from the Mountain itself a magnificent view may be obtained over the country, and, on a clear day, the lighthouse at Toronto, 45 miles distant, may be seen by the naked eye. The chief business portion of the City is situated about a mile back from the Bay. The City is well lighted with gas; and a complete system of sewerage is being carried into effect. The chief business streets are King, James, John, York, and MacNab Streets. The Gore Bank has its head establishment here; and the Bank of British North America, the Commercial, Upper Canada, Montreal, and Toronto Banks have each a branch in the City. Magnificent water works, at an estimated cost of $800,000, are now in course of construction; the water for which is to be brought from Lake Ontario, a distance of about nine miles, and pumped into a distributing reservoir in the eastern part of the City. A basin is to be constructed in Burlington Beach, into which the water will naturally filter. A plan of new market buildings has been adopted by the City, and the works will shortly be put under contract; and when completed, the buildings will not be excelled in Canada. Hamilton is the seat of some of the most extensive manufacturing establishments in the Province, among which may be mentioned locomotive works, foundries, car works, machine shops, scale works, &c. It communicates with Lake Ontario by means of a large canal constructed through the Beach, which separates Burlington Bay from the Lake. The City is connected with Dundas by the Desjardins Canal, a navigation of about four miles in length. Burlington Bay is a large and beautiful basin of water, navigable in all parts within a few yards of the shore, and makes one of the safest and most commodious harbors on the Lakes. In summer, daily lines of steamers and propellers run between Hamilton, Toronto, Kingston, and Montreal; and by means of the Hamilton and Toronto and the Grand Trunk Railways, these points are accessible at all seasons of the year. Hamilton returns one Member to the Legislative Assembly. Distant from Niagara Falls 45 miles, from London 76 miles, from Toronto by railway 38 miles, and from Montreal 378 miles. Population about 20,000.

Main Line opened 27th January, 1854; length of road from Eastern terminus, Niagara Falls, to Western, Windsor, 229 miles.

The main line extends from Windsor to Niagara, connecting with the state of New York at the latter place by a Suspension bridge, which is leased by the Great Western Railway Company, and at the former with Detroit, in the State of Michigan, by ferry boats, the property of the Company.

There is a branch line, of 38 miles, from Hamilton to Toronto, where it connects with the Grand Trunk Railway. There is another branch from Harrisburg to Preston, 12 miles, which will shortly be opened to Guelph, 11½ miles further. A branch line is under construction between Preston and Berlin, a distance of 10½ miles.

There is also a branch line under construction between Komoka, near London, and Sarnia, 60 miles long, where it will connect, by ferry boats, with the Port Huron, Detroit and Milwaukie Railway, also with propellers, &c., on Lake Huron.

There are three through fast trains going west daily, and four going east daily.

There are four passenger trains each way on the Toronto branch, and as many on the Preston branch.

The average speed of fast passenger trains is 30 miles an hour; the average speed of freight trains is about 15 miles an hour.

HOCHELAGA, C. E.—An incorporated Village on the North bank of the St. Lawrence at the foot of the Current St. Mary, opposite Longueuil, and immediately adjoining the Eastern suburbs of the City of Montreal. It was originally an Indian village, belonging to the Hurons, which they deemed sufficiently important to maintain in a fortified state. The French made their first successful settlement on the island at this place, about the year 1640. The change of the site of Montreal from Hochelaga to its present position seems not to have been purposely effected, but to have been occasioned by the establishment, in 1657, of the Seminary of St. Sulpice, and of a hospital which its managers founded for the benefit of the inhabitants, which naturally attracted to that portion of the island the subsequent emigration from France. A commodious wharf was constructed here last year, to accommodate the transatlantic Canadian steamers. Population about 300.

KINGSTON, C. W.—The Chief Town of the United Counties of Frontenac, Lennox and Addington, is situated at the head of the River St. Lawrence, where Lake Ontario, the last link of the chain of the inland seas of Western Canada, together with the Bay of Quinté and the Great Cataraqui Creek, is united with the channel which conveys and empties their waters into the Gulf of St. Lawrence. It is one of the oldest settled localities in Upper Canada, and occupies the site of the French fort of Frontenac; was founded in 1784, and incorporated in 1838. Opposite the City are Wolfe Island and Garden Island; and between them and Kingston, a distance of three miles, lies the Bay, a beautiful sheet of water, forming a safe and commodious harbor for vessels of every draught. Additional and improved wharves have lately been constructed; which, together with those previously in use, renders it in every respect well calculated for an extensive shipping trade. Kingston, at no distant day, promises to be an important manufacturing City. Already the trade of shipbuilding has arrived at great proficiency. Sailing vessels and steamboats of every capacity are here built and fitted out with every requisite, ready for the Lake or Ocean navigation. The Marine Railway Co. has at different times built and fitted out vessels which have been loaded and sent direct from Kingston to England; and the largest steamboats that now navigate Lake Ontario and the River have been built and furnished with everything necessary at the same establishment. There are two shipbuilding yards in Portsmouth, a flourishing village within a mile of the limits of the City. The timber necessary for the construction of vessels—oak, pine, cedar, elm, knees, masts, &c.—is brought from the neighboring Townships; and the iron work, including every description of machinery for steamboats, &c., is furnished by the different foundries in the City. The sail and cordage lofts are kept well supplied; and in short, all the means and appliances for the complete outfit of every sized vessel are always ready at hand. Portable steam engines for mills and other descriptions of work are manufactured in Kingston; locomotives for railways, agricultural implements, stoves of every description, iron axles, cut nails, screw bolts, &c., &c. The Victoria Iron Works, of Messrs. Chewett & Co., situated on the corner of King and Queen streets, is the largest manufacturing establishment in the City. It gives employment to 75 men, and turns out per diem three tons of finished iron in bars, made from scraps; which is now taking the place of "Swedes," the latter having become a scarce and expensive article. The amount annually expended for "scraps," or waste iron, is about $28,000; in the manufacture of which into bars and axles there are consumed 15,000 tons of coal, besides a considerable quantity of wood. In the axle shops, a ton of finished axles for carriages, with boxes, screw ends, and nuts complete, are made every working day, most of which find sale in Western Canada. There are also made here a large quantity of bolts, screws, &c., used in carriagemaking; and the total aggregate weight of iron, axles, &c., manufactured annually, is estimated at 9,000 tons. There are several tanneries, one on a very complete and extensive scale at Portsmouth, four breweries, and a distillery (Morton's); the latter consuming annually 200,000 bushels of various kinds of grain. The Grand Trunk Railway passes within two miles of the City; but it will be connected with the Town shortly by a branch railroad. As a place of defence, Kingston stands next in strength to Quebec. The batteries of Fort Henry are calculated for the reception of numerous cannon and mortars of the largest calibre. These, together with neighboring martello towers, form a formidable and efficient defence against any aggressive movement which might be directed against the City or neighbouring country. The City possesses two Colleges, Queen's and Regiopolis. It has several magnificent public buildings; amongst which may be enumerated the City Buildings, New Court House, &c. The Commercial Bank of Canada has its head quarters here, and there are branch establishments of the Banks of British North America, Montreal, and Upper Canada. Kingston returns two Members to the Provincial Parliament. It is in lat. 44° 8′ N., lon. 78° 40′ W. from Greenwich. Distant from Montreal 198 miles, and from Toronto 165 miles. Population, including the military, about 13,000.

LONDON, C. W.—The chief seat of the County of Middlesex, and the westernmost City of Canada, beautifully situated on the River Thames,—a name, with those bestowed on the City, its bridges, and principal streets, that affords evidence of a desire to imitate, or to bear in remembrance, the principal City of the British empire. The growth of London has been more rapid than that of any other place in the Province, for in 1825 the present site of the City was a wilderness. It is laid out in wide streets, at right angles to each other, and is remarkably well built. The buildings generally, especially many of those required for public purposes, are beautiful specimens of appropriate architecture; among which may be noticed the English Church, a Gothic structure, with a chime of bells, the only one in Western Canada,—than the sound of which nothing can more surely tend to revive the reminiscences of former residents of the ancient city. London is the centre of a rich agricultural district, which furnishes it a large trade in wheat and other agricultural produce; while in various important manufactures it is making rapid progress. The City is lighted with gas. It is a Port of Entry; so that, amongst other advantages which its trade enjoys, goods may come direct through the United States under bond. There is a Board of Trade; and no fewer than five agencies of the Provincial Banks have been established, as also six newspapers. As might reasonably be expected from the enterprise hitherto characterising London, the important advantages derivable from railway communications are unusually extensive. The Great Western Railway passes through the City. There is also a Railway direct to Port Stanley, and lines are projected to Sarnia and Port Frank, on Lake Huron. A Railway to St. Mary's is in course of construction. Distant from Hamilton 70 miles, from Toronto 114 miles, from Montreal 447 miles, and from Sarnia 56 miles. Population about 16,000.

MONT ST. HILAIRE, C. E.—A Village situated at the base of the Mountain which is known under the names of Belœil, Chambly, and Rouville Mountain, in the Seigniory of St. Hilaire and County of Rouville. During summer it is a place of great resort for pleasure parties. The Mountain rises to the height of 1400 feet above the level of the St. Lawrence at Montreal. From its summit may be seen the City of Montreal, and the Rivers St. Lawrence, Richelieu, Yamaska, and St. Francis. Some way up its side is a lake, the stream from which gives a fine water power, putting in motion several mills. Its base is covered with rich and thriving orchards of apple trees, the soil being very favorable to their growth and perfection of fruit. A superior hotel, recently erected, on an elevated spot, affords an extensive view of the surrounding country. Distant from St. Hilaire 3 miles, and from Montreal 22 miles. Mail daily.

MONTREAL, C. E.—The largest and most populous City of British North America, and chief seat of commerce and principal Port of Entry for the Canadas, is situated at the head of sea or outward navigation; and at the foot of the great chain of River, Lake, and Canal navigation, which extends westward to Chicago and Fond du Lac, a distance of about 1400 miles, embracing an almost unequalled extent of inland water communication. It occupies one of the most commanding positions in America; and stands on a large, fertile, and beautiful island of the same name, 30 miles in length by 10 miles of extreme breadth, formed by the confluence of the Ottawa and St. Lawrence Rivers, and on the north bank of the latter. Thus situated at the point of junction of two very important rivers, with a free communication seawards (though 90 miles above the influence of the tides, and upwards of 300 miles from salt water), Montreal possesses all the advantages of both an inland city and a seaport, accessible to steamships and other vessels of over 1800 tons burthen. Holding too the keys, as it were, of the navigation of the Canals and Lakes,—the latter styled "the new Mediterranean,"—its position with reference to Quebec, Canada West, the Western States, New York, Boston, Albany, Portland, Nova Scotia, New Brunswick, Newfoundland, Prince Edward Island, makes it, by means of its extensive water and railway communications, the great centre of attraction and COMMERCIAL EMPORIUM of Canada. The City is the chief seat of manufacturing operations in the Province; and it has many extensive and costly establishments, the productions of which will compare favorably with those of other countries. The principal business streets are Notre Dame, St. Paul, Commissioners, McGill, Great St. James, and the Main Streets of the St. Lawrence, Quebec, St. Anns, St. Joseph, and St. Antoine Suburbs. The City and Suburbs are well lighted with gas, and many of the principal streets paved with stone. From whichever side approached, Montreal and its vicinity (the wood-clad "Mont Royal" forming a magnificent background), with its numerous beautiful villas, orchards, and delightful drives, its grand and stately edifices, and many elegant public and other buildings of cut stone, adorned with glittering roofs and domes, tall spires and lofty towers, present to the view of the beholder a vast, picturesque, and grand panorama. Among the many handsome buildings of which Montreal can boast, space only admits the mention of a few,—the Bonsecours Market, erected at a cost of $287,300, which is said to be the finest market building on the Continent; the Court House, costing $296,569; the French Cathedral, the Bank of Montreal, the City Bank, Bank of British North America, St. Andrew's (Scotch) Church, McGill College, the Jesuits' College, the General Hospital, St. George's Church, Wesleyan Church, the Post Office, and Custom House. Montreal has also magnificent water works, lately constructed, at an outlay of over $1,200,000. The water is drawn from the St. Lawrence, a mile and a half above the Lachine Rapids, and conducted a distance of five miles through an open canal to a capacious basin, where it is, by powerful and costly machinery, forced up through the pumping-main, two miles and three quarters in length, to reservoirs on the brow of the Mountain, capable of containing fifteen million gallons. The Harbor and Basins, into which the last link of the great Canadian inland canals debouches, though not large, are good, convenient, and safe; and they are capable of indefinite extension and improvement at comparatively small expense. The wharves, extending over a mile in length, are surmounted by a massive cut-stone wall, along the height of which is a pleasant promenade and wide street, affording a fine view of the river and its shipping. There are numerous inclined planes from the wharves, by which carriages ascend to the street above; and the whole, for appearance, commodiousness, and cleanliness, is unexcelled by any port on the continent. From Point St. Charles, at the head of the Harbor, to St. Lambert, on the opposite shore, a distance of about two miles, this great "Father of Rivers"—the Saint Lawrence—is being spanned by the Victoria Bridge. With its two long abutments and twenty-four massive piers of solid masonry, this bridge of iron, built on the tubular principle,—the greatest work of the kind ever attempted,—with its centre track for cars and locomotives, and projecting wings forming on either side a pathway for foot passengers, will be when finished the masterpiece of engineering and wonder of the world. So situate, Montreal even at present possesses unrivalled facilities and advantages for commerce, whether foreign or domestic; and when the Victoria Bridge is completed, it cannot fail to become the great central depot for the traffic of a chain of unbroken railway communication upwards of 1100 miles in length, with its numerous tributaries and connections. The cars of the Grand Trunk Railway run daily to Quebec, Portland, and Canada West; connecting at Toronto with the Great Western, and the Ontario, Simcoe, and Lake Huron Railways—in a word, with the Great West. By the line to Portland, a communication with the States is obtained, and a winter seaport afforded. The Champlain and St. Lawrence and the Montreal and New York Railways also afford direct communication with New York, Boston, and the principal Cities in the United States, and connect with all the Southern roads on the Northern part of the Continent. In summer, to these advantages, as already observed, is conjoined that of the navigation, which is usually open from about the middle of April to the end of November. A line of splendid, powerful, and fast screw-steamers, subsidized by Government and performing regular mail-service, ply weekly in summer between Liverpool and Montreal, and fortnightly in winter between the former place and Portland. During the season of navigation, daily lines of steamers, propellers, and other vessels run between Montreal and Quebec, Ottawa, Prescott, Brockville, Kingston, Cobourg, Port Hope, Toronto, Hamilton, and many other Lake and River ports, eastward as well as westward. Up to 1832, Montreal was merely an out-port of Quebec: that year it was made a free and separate port of entry; and its annual progress since has been remarkable. In 1856 the value of imports was $16,144,696, and of exports $3,825,564; vessels from sea 232 with an aggregate burthen of 69,062 tons. Value of assessed property in 1856, $25,5[illegible]; and revenue of the City, from all sources, $285,032. Montreal is distant from Liverpool 2750 miles, from Quebec [illegible] miles, from Kingston 173 miles from Toronto 333 miles, from Ottawa 120 miles, from New York 400 miles, from Boston 334 miles, and from Portland 292 miles. The City returns three members to the Provincial Parliament. Its population is about 75,000, and is steadily increasing: during 1856 the increase exceeded 5000.
